Key Instant Recall Facts Year 5 – Summer 2

I can find factor pairs of a number

By the end of this half term, the children should know the following facts. The aim is for them to recall these facts **instantly**.

Children should know all multiplication and division facts up to 10×10 . When given a number in one of those times tables, they should be able to state a factor pair which multiply to make this number (product).

Key Vocabulary

Can you find a **factor** of 28?

Find 2 numbers whose **product** is 20.

I know that 6 is a **factor** of 72 because 6 multiplied by 12 is 72.

Top Tips!

The secret to success is practising **little** and **often**. Use time wisely. Can you practise these KIRFs while walking to school or during a car journey? You do not need to practise them all at once; perhaps you could have a fact of the day? If you would like more ideas, please speak to your child's teacher.

Play online – Your child should already be accessing Times Tables Rock Stars regularly at www.ttrockstars.com. Please contact their teacher if you have misplaced their log-in details. They can also visit www.timestables.co.uk and www.timestables.me.uk

Think of the question – One player thinks of a times table question (e.g. 4×12) and states the answer. The other player has to guess the original question.

Use memory tricks – For those hard-to-remember facts, www.multiplication.com has some strange picture stories to help children remember.
