

Key Instant Recall Facts Year 6 – Summer 2

I know the first 5 cube numbers

By the end of this half term, the children should know the following facts. The aim is for them to recall these facts **instantly**.

A cube number is found when we multiply a number by itself and then itself again.

For example, $n \times n \times n$. It can be written as n^3

The first 5 cube numbers are:

$$1 \times 1 \times 1 = 1$$
$$2 \times 2 \times 2 = 8$$
$$3 \times 3 \times 3 = 27$$
$$4 \times 4 \times 4 = 64$$
$$5 \times 5 \times 5 = 125$$

Children should be able to explain what a cube number is and recall the first five cube numbers quickly

Use visual images to help children understand what a cube number is.

Top Tips!

The secret to success is practising **little** and **often**. Use time wisely. Can you practise these KIRFs while walking to school or during a car journey? You do not need to practise them all at once; perhaps you could have a fact of the day? If you would like more ideas, please speak to your child's teacher.
