

## Year 3 Homework

Autumn 1 2023

You can complete as many of the activities as you would like but I would like to see **at least five** of them completed before half term and they need to be from different boxes.

If you are completing a writing task, remember to think about the vocabulary you use in your writing.

### English

Write a diary entry based on something you have done. Make sure you describe each event in detail and include how you felt at each part.

Create an adventure for Paddington.  
(Remember to write a plan first to make sure your story fits together. Remember to describe each event in detail and try to include a range of vocabulary.)

### Maths

Write down 5 three digit numbers. Partition these numbers in three different ways.

Create 5 column addition questions using three digit numbers and have a go at answering them (remember to exchange if you need to).

Create 5 column subtraction questions using three digit numbers and have a go at answering them (remember to exchange if you need to).

### Geography

Look up a place that you have visited and identify the following things:

- Physical features (things that occur naturally)
- Human features (things that are made by humans)

### Art

Create a picture using paint. Make sure you create different shades of the same colour to add detail to your picture.  
(Remember the colour spectrums we created in class).

### Science

Carry out a science investigation into how well objects in your house reflect light.

Remember to make sure you write out your instructions, make predictions and record your results.

### RE

Carry out some research into one of the following Christian prophets thinking about what they were called to do:

Isaiah (Isaiah Chapter 1)

Noah

Have a go at creating a storyboard or comic strip of the message they were given and what they did with it.

### Computing

1. Carry out research and create a PowerPoint on something that interests you. Make sure you include lots of interesting facts. Get a parent to send your PowerPoint to me so that you can share it with the class.
2. Have a go at using the following website to practise your coding skills <https://hourofcode.com/uk> (take a picture and send it your homework book)
